

Acrylic Scratch Remover

Instructions:

1. Clean the surface and apply a little paste.
2. Using a soft, clean cotton cloth or pad polish the scratched areas using heavy pressure for 2-3 minutes.
3. For deep scratches repeat application several times.
4. Very deep scratches should be treated beforehand with special abrasive paper (grit: 1600) and a little water. Remove the residue and clean with water. Dry the area and polish with the Acrylic Scratch Remover.

Do not use on any printed, varnished or coated surfaces. Do not use on Polycarbonate (PC). To be on the safe side, first test the polish on an unexposed surface. Keep out of reach of children.
